THE RANGE

Six launch colours

Selected to cover the most useful light, neutral, natural and warm timber looks. Supplier codes stay visible so samples and cartons can be matched accurately.

**HW3048-5**

Coastal Ash

Light neutral grey for bright contemporary rooms.

[REQUEST A PHYSICAL SAMPLE](#)**HC6033-2**

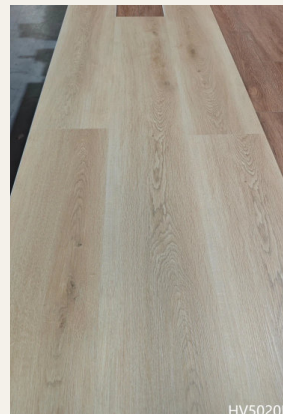

Silver Oak

A cool, calm oak suited to coastal and monochrome palettes.

[REQUEST A PHYSICAL SAMPLE](#)**HY742-2B**

Natural Oak

Balanced natural oak character for broad residential appeal.

[REQUEST A PHYSICAL SAMPLE](#)**HV5020B-1**

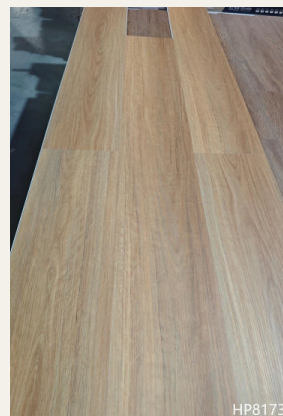

Nordic Blonde

Pale, low-contrast styling that helps smaller rooms feel open.

[REQUEST A PHYSICAL SAMPLE](#)**HC6070-6**

Sandstone Oak

Warm beige undertones for cream, stone and timber cabinetry.

[REQUEST A PHYSICAL SAMPLE](#)**HP8173-2**

Classic Spotted Gum

A richer Australian-inspired tone for feature interiors.

SURFACE BP timber texture, UV coated

EDGE Micro V-groove

Launch supply pricing from A\$32.90/m² incl. GST

APPROX. CARTON WEIGHT 22.08 kg

HOW TO BUY

A simple four-step process

01**Choose colours**

Select two or three physical samples and view them in morning, afternoon and artificial light.

02**Measure the area**

Provide dimensions or arrange a Perth measure so wastage, trims and transitions are allowed for.

03**Confirm the scope**

Choose supply only, delivery, or supply and installation with any removal and preparation itemised.

04**Approve and schedule**

Approve the written quotation, confirm stock and schedule delivery or installation.

Order calculator

Area x wastage allowance, then round up to full cartons of 1.7328 m².

Example: 80 m² + 10% = 88 m²

Order 51 cartons = 88.37 m²

PROJECT PLANNING

What affects the final price?

1 Floor area and wastage

Straight rooms may need around 7-10% allowance; complex layouts, diagonals and repairs may need more.

2 Subfloor condition

Levelling, grinding, moisture issues, loose substrates and height transitions must be assessed before installation.

3 Existing floor removal

Carpet, laminate, tiles, skirting and disposal should be separately itemised in the written scope.

4 Trims and details

Reducers, T-mouldings, end caps, stair nosings, door jambs and skirting can materially change labour and material cost.

5 Access and scheduling

Apartments, stairs, restricted parking, staged construction and after-hours work may affect delivery or installation.

6 Project suitability

Wet areas, direct sunlight, temperature exposure and building-specific acoustic requirements need project assessment.

IMPORTANT BEFORE ORDERING

Approve a physical colour sample and written scope. Product photos are indicative; screens, lighting and manufacturing batches can affect appearance. Installation must follow the approved instructions and project conditions.

Ready to compare colours?

Request samples and a written quote.

Send your suburb, approximate floor area, preferred colours and whether you need supply only or installation.

SERVICE AREA

Perth, Western Australia

Technical specifications are based on the final supplier order documents reviewed for this launch range. Fire, slip, acoustic, emissions, warranty and regulatory claims should only be published after the relevant report is matched to the exact supplied product and reviewed for the intended Australian application.
